SECTION II: Information Warehouse

Protected Health Information (PHI) or Personally Identifiable Information (PII) Access: *(See Section III on Page 3 for list of PHI/PII identifiers)*

- Select only one level
- Level 0 – No Restrictions (may view all PHI/PII)
 - Level 1 – Semi Restricted (may view city/ZIP code, dates, diagnosis & procedure information only)

For Level 0, please provide explanation as to why access to specific PHI/PII is required:

Data Access Requirement: *(See Sections IV and V on Pages 3 and 4 for a description of Subject Areas)*

Subject Area	Access Requirement
Web Content Only (Standard reports, Reference Materials, etc.) – Unlimited number of users permitted.	
Data Warehouse Access: LIMITED to 2 individuals per MTF or eMSM. Access to the Data Warehouse allows the user to access the Standard Queries and build their own queries. This access is intended for analysts who need more than the standard Web Content.	
Data Warehouse (Business Objects) Access. (Limited licenses)	
ONLY if Data Warehouse Access was selected, select "Access for each of the Universes (subject areas of the Data Warehouse) needed, below.	
Claims (includes Mart)	
Enrollment/Patient/BIS (includes Mart)	
Provider	
Call Center	
Medical Management	
Government Data (direct care, eligibility, TED, pharmacy, lab)	

Note: Business Objects cannot be accessed unless we have a current Government Facility IP Whitelist Provisioning Form from your IT department on file. In the interest of protecting TRACARE data, HNFS must whitelist all MTF public facing IP addresses used to access Business Objects. To avoid unneeded delays, we recommend you confirm that your IT department has provided this form and that it is updated with your current IP ranges. A blank version of the form can be found on can be found on Tricare-West under Information Warehouse.

SECTION V: Information Warehouse Subject Areas

Data Warehouse – The Health Net Data Warehouse contains a wide range of information including those subject areas discussed below. **Limited licenses are available**

Claims

- The Claims DataMart should be used as the primary claim source for trending purposes. Includes the most commonly used fields related to institutional and non-institutional paid and denied claims. Includes net amounts for each claim line after all adjustments have been taken into consideration. The Claims DataMart is updated on a monthly basis.
- The Claims Warehouse contains all fields related to both paid and denied institutional and non-institutional claims. Updated after each payment cycle.

Enrollment

- The Enrollment DataMart should be used as the primary enrollment source for trending purposes. Includes month end enrollment counts for each enrollee including Primary Care Manager assignment, ZIP code information, etc. The Enrollment DataMart is updated on a monthly basis.
- The Enrollment/Patient Warehouse contains multiple tables including demographic and PCM information for enrolled beneficiaries, fee information for enrolled beneficiaries and patient-level demographic information for enrolled beneficiaries as well as any West beneficiary with a processed claim. Updated on a daily basis.
- The Beneficiary Information System (BIS) files are focused specifically on beneficiaries with Other Health Insurance (OHI) coverage. Updated on a daily basis.

Provider – Contains information network and non-network providers including demographic and specialty information. Updated on a daily basis.

Contact Tracking – Contains information on beneficiary and provider contacts, and includes phone calls and correspondence. Updated on a daily basis.

Medical Management – This set of files contains information on medical management records including all referrals and authorizations. Updated on a daily basis.

Government Data – Contains direct care, eligibility, pharmacy, and TED data for beneficiaries in the West. Updated on a monthly basis.
